TECHNOLOGY SECTION

- Tools: Power BI, Excel, Jupyter Notebook, GitHub
- Languages: SQL, Python

SUMMARY

- Data Analyst skilled in SQL, Python, and Power BI with hands-on experience in building dashboards and extracting business insights. Experienced in data cleaning, EDA, and KPI tracking. Passionate about solving real-world problems using data and creating actionable insights to improve business performance.

PROJECT

EdTech Student Learning & Placement Analysis Dashboard

- Built a data-driven dashboard to track student learning behavior, placement success, and revenue performance, enabling better decision-making for improving educational outcomes.

RFM Analysis & Dashboard (BigQuery, Power BI)

- Segmented customers using RFM analysis and built a Power BI dashboard for business insights.

BigBasket Product Analytics Dashboard

- Developed an Excel-based analytics dashboard with KPIs, pivots, and slicers, combined with Python data cleaning, to uncover insights on pricing, discounts, and customer ratings.
