📍 Surat, India

ABOUT ME

Aspiring Data Analyst and Data Science professional with a solid foundation in Python and SQL, experienced in data cleaning, exploratory data analysis (EDA), and data visualization. Highly motivated to leverage strong analytical thinking and problem-solving skills to tackle real-world, data-driven challenges and generate actionable insights.

EDUCATION

BACHELOR OF COMPUTER APPLICATIONS (BCA)

Veer Narmad South Gujarat University

- 77.00%

HIGHER SECONDARY (12TH)

Gyan Jyot Vidyalaya

- 83.42%

SECONDARY (10TH)

Gyan Jyot Vidyalaya

- 66.67%

SOFT SKILLS

- ◆ Analytical Thinking
- ◆ Problem-Solving
- ◆ Attention to Detail
- ◆ Logical Reasoning
- ◆ Communication
- ◆ Time Management
- ◆ Team Collaboration
- ◆ Willingness to Learn

SKILLS

Python (Pandas, NumPy, Matplotlib, Seaborn)

Data Cleaning, EDA, Data Visualization

Excel, Jupyter Notebook

SQL (MySQL)

Statistic(Mean, Median, Correlation)

CERTIFICATIONS

DATA ANALYTICS JOB SIMULATION | *Deloitte (Forage)* | Oct 2025 - Oct 2025

AI TOOLS & CHATGPT WORKSHOP | *be10X* | Nov 2025 - Nov 2025

PROJECT

TITANIC DATASET CLEANING & ANALYSIS | PYTHON

- Cleaned and preprocessed raw data using Pandas and NumPy
- Handled missing values, corrected data types, and removed inconsistencies
- Performed exploratory data analysis to identify survival trends
- Prepared analysis-ready datasets for visualization and reporting

SALES ORDER MANAGEMENT SYSTEM | SQL (MYSQL)

- Designed a normalized relational database for sales operations
- Implemented primary keys, foreign keys, and constraints
- Executed CRUD operations and complex queries using JOINS and subqueries
- Analyzed revenue, order totals, and top-selling products

CUSTOMER, ORDER & EMPLOYEE ANALYSIS | SQL

- Analyzed relationships using INNER, LEFT, RIGHT, and FULL OUTER JOINS
- Used subqueries and aggregate functions for performance analysis
- Applied window functions (RANK, running totals) for advanced insights
- Implemented CASE expressions and date functions for reporting
